OMKAR RANADIVE

omkar.ranadive@u.northwestern.edu | linkedin.com/in/omkar-ranadive/ | https://omkar-ranadive.github.io/

EDUCATION

Northwestern University — **Evanston, Illinois**
Master of Science in Computer Science — *September 2019 - Present*

K.J Somaiya College of Engineering — **Mumbai, India**
Bachelor of Technology in Computer Engineering, CGPA: 8.99/10 — *August 2015 – May 2019*

- **Relevant coursework:** AI, Machine Learning (Topper), Neural Nets, Image Analysis (Topper), Fundamentals of Programming (10/10, AP), Data Structures, Algorithms, Computer Architecture (10/10), Operating Systems (Topper)

WORK EXPERIENCE

K.J Somaiya College of Engineering — **Mumbai, India**
Deep Learning Intern — *January 2018 – April 2018*

- Researched different methodologies of k-shot learning and developed a facial recognition system which can be trained on a small number of samples to perform fast and accurate recognition of faces.

Accelo Innovation — **Mumbai, India**
Machine Learning Intern — *August 2017 – October 2017*

- Implemented object detection, depth mapping and lane detection modules.
- Integrated the modules along with a CNN model and created a usable API.

PAPERS

- Karan Joisher, Suhaib Khan, Omkar Ranadive. "**Simulation Environment for Development and Testing of Autonomous Learning Agents"**. Presented at ICAST 2019, published in Elsevier-SSRN, April 2019.
- Omkar Ranadive and Dhiti Thakkar. **"k-Shot Learning for Face Recognition".** International Journal of Computer Applications 181(18):43-48, September 2018.
- Karan Joisher, Omkar Ranadive, Suhaib Khan. **"Framework for low cost driver-assistance system"**. Winner of IEEE Technical Paper Presentation, Abhiyantriki, 2017.

PROJECTS

- **Simulation Environment for Development and Testing of Autonomous Learning Agents, Final Year Project:** Built a virtual environment for autonomous driving agents with customizable parameters, simulated pedestrian and vehicular traffic and plug and play interface for supervised and reinforcement learning agents.
- **Password Cracking and Strengthening Tool:** Programmed a GUI based tool in Python for cracking passwords which can run different attacks and has adjustable parameters. It also suggests easy to remember strong passwords.
- **Context Aware Searching:** Created a program which predicts related keywords based on input query using N-Gram Model and a Neural Embedding Network.
- **Credit Card Fraud Detector:** Developed a credit card fraud detector which detects fraudulent transactions using Anomaly Detection.
- **Poetry Writer AI:** Developed a poetry writer which learns to write poetry using N-Gram Model.
- **Movie Recommender and Scraper:** Implemented a movie recommender system which forms the database by scraping information from the internet and recommends movies based on past user preferences.
- **AI based Tic Tac Toe:** Developed a GUI based Tic Tac Toe agent in Java based on mini-max algorithm.
- **Mall Pro:** Created an android application to get real-time listing of offers and latest deals of store outlets in malls.

SKILLS

Programming Languages: Python, Java, C++, C.
Libraries: Tensorflow, Scikit-Learn, Numpy, OpenCV, Pandas, NLTK, OpenAI-gym, Keras, TFLearn

CO-CURRICULARS

CSI KJSCE, Student's Chapter — **Mumbai, India**
Second Year Representative and First Year Representative — *March 2016 – July 2017*

- Created content, coding questions for coding competitions and technical workshops.
- Taught in workshops like Machine Learning and Cryptography and managed over 20+ events and seminars.

CERTIFICATIONS

- Machine Learning by Stanford University on Coursera, June 2017.
- Deep Learning Specialization by DeepLearning.AI on Coursera, February 2018.
